Cedar Ridge Canoes are now available in five models and various colors such as: Cranberry Red, British Racing Green, Marsh Brown, Marsh Green and Striped Camouflage patterns. These very stable, lightweight canoes are constructed of hand laid fiberglass using an old familiar Wisconsin made canoe design.

This craft has a very good weight carrying capacity, so it is appreciated by anglers, hunters, trappers and recreational paddlers alike. These boats have a far superior stability factor allowing the canoeist to stay dry and above water. The Cedar Ridge Canoes also have a continuous metal keel for added durability and it increases the tracking ability.

The "Guppy" (traditional ends) and the "Puddle Jumper" (top half square stern) are 10' 6" in length and will carry 450 pounds. The Puddle Jumper is rated for a 3 H.P. motor.

The "Cat Tail" (traditional ends) and the "Angler" (top half square stern) are 12' 9" in length and will carry 750 pounds. The Angler is rated for a 4 H.P. motor. All of four of these canoes can be fitted with a carrying yoke and oar locks.

The largest of the five canoes is the "Sturgeon". This craft will offer musky hunters, fly fisherman and water fowlers the extra space and stability that they look for. The Sturgeon is 15' 10" long, carries 1,050 pounds and is rated for a 6 H.P. motor. This model also is equipped with two sets of oar locks making it ideal to troll for the big ones.

You must experience the stability and handling of these canoes first hand to appreciate them and their uniqueness. For more details about these canoes, contact: White Potato Lake Outfitters, LLC - Coleman, Wisconsin.
